[GitHub: github.com/Em1Torres](https://github.com/Em1Torres)

## PROFESSIONAL PROFILE

Software Engineering student with hands-on experience in full-stack web application development, backend architecture, and database management. Combines technical proficiency in Node.js, C++, and SQL with strong teamwork, adaptability, and leadership built through academic, athletic, and community-service environments. Actively expanding cloud and AI-tooling skills through self-directed certifications.

## EDUCATION

### Tecnológico de Monterrey, Campus Santa Fe

*Expected Graduation: May 2028*

*B.S. in Computer Technologies Engineering (Software Engineering) — 5th Semester*

## TECHNICAL SKILLS

**Programming Languages:** C++ (Intermediate), Python (Intermediate), JavaScript (Intermediate), SQL (Intermediate), Racket, MATLAB, R

**Web & Backend Development:** Node.js, Express, CORS, RESTful API design, MySQL (mysql2), relational database schema design, HTML5/CSS3, React-Admin (basic)

**Developer Tools & Workflow:** Git, GitHub (version control, branching), Visual Studio Code, Windows PowerShell

**Methodologies:** Scrum (Agile), full-stack architecture, data structures, algorithm design, problem solving, technical instruction

**Languages:** English (Advanced Proficiency), Spanish (Native)

## PROJECTS

### Anura — 2D Action-Platformer Web Application

*April 2026*

*Team project | GitHub: [github.com/a01786687/Videojuego-Equipo8](https://github.com/a01786687/Videojuego-Equipo8)*

- Built the backend of a full-stack web application, integrating a Node.js/Express server with a MySQL database and a JavaScript frontend developed from a course-provided starter template.
- Designed and implemented procedural level-generation algorithms and a relational database schema for user data management.
- Configured Express middleware (CORS, mysql2) to enable RESTful API communication between the client and server.
- Applied modular software design and debugging practices while integrating pixel-art assets into the frontend.

### Cost-Effective, Innovation-Driven Product Concept

*June 2025*

- Collaborated on engineering optimization and feasibility analysis for a product concept balancing affordability with functional innovation.
- Applied functional design principles and cost-efficiency metrics to streamline hardware performance.

## LEADERSHIP & EXTRACURRICULAR EXPERIENCE

### Varsity Athletic Student — Borregos Tec Volleyball Team

*August 2025 – Present*

- Balance a full varsity competition and training schedule with a full-time engineering course load, strengthening discipline and time management.
- Foster team synergy and strategic communication as part of a competitive team under high-pressure conditions.

### Mathematics Instructor — Social Service Project

*January 2026 – June 2026*

- Delivered personalized instruction in algebra and applied mathematics to elementary school students.
- Created tailored learning exercises to strengthen comprehension and problem-solving skills.

## CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- Pursuing: AWS Certified Cloud Practitioner — in progress
- Claude Academy (Anthropic) — Claude Code in Action, Course Completion Badge (September, 2026)
